Editorial Notes.

Physical Fitness.

No section of the community should be more delighted than the medical profession that at long last the people in general, and the Government in particular, are anxious to see that everything is done which will increase the physical fitness of the race. Whatever may be thought and said to the contrary, the health of the people has been the aim of the profession from time immemorial. Hippocrates and his long line of worthy descendants have, according to their various lights, indicated the mode of living which promotes health and well-being, and it should always be remembered that it was the medical man who created and laid the foundations of Public Health. Hence there can be little doubt that the medical profession will do all that lies within its power to render the schemes of the Government successful.

That great good will accrue from the campaign there can be no doubt, but from some of the talking and writing on the question there is a real danger that there will be created in the public mind the erroneous impression that, if the race is physically fitter, there will necessarily result a diminution in the incidence of disease. Would that this might be so. The incidence of all infectious disease depends on contact with the contagion and on the resistance (immunity) of the individual, and we know that immunity is not proportionate to physical development. Indeed, one of the most striking features of the incidence of disease is that it is often the best developed and apparently the healthiest who contract certain infections. Infantile paralysis and epidemic cerebro-spinal fever are two good examples. Even in the case of tuberculosis, so often quoted as related to under-nutrition and under-development, it has been shown that the physically fit child is just as likely to contract pulmonary infection as the physically unfit. We must constantly reiterate that cleanliness of the home, the avoidance of overcrowding, ample fresh air, a pure water supply and a pure milk supply, and the proper disposal of the excreta, are the means by which disease will be most certainly controlled.

One important feature of the scheme, and one in which the medical man must be particularly concerned, will be the devising of suitable exercises for different classes of individual. Unless this aspect of the question is properly handled harm rather than good may result. Many of us cannot have forgotten the evil effects of forced training during the late war. The young and vigorous may be forced with impunity, indeed the immunity of the expert athlete to the dangers of the most rigorous training is proof of this fact. But the athlete is not a particularly fine specimen of humanity solely because of his regular exercise but in great part because of his inheritance. He was born with a good machine and thus repays the labour expended upon it. The danger will be with the older and the middle-aged, who, feeling that they are not as they once were, will often go to any lengths in an attempt to recall their youth. These of our patients we must put on their guard lest harm rather than the anticipated benefit may ensue. 

We are also confident that we will have the support of the whole profession when we make the plea that, whenever possible, sports rather than games and exercises should be employed for the purpose of improving the physique. Football, hockey and also tennis, for example, not only provide for the finest of bodily exercises but they develop that co-operative feeling so essential for the social well-being and they engender that invaluable spirit of the sportsman for which the Englishman is justly famous. But even if we take the most materialistic of reasons, the creation of efficient soldiers for the defence of our heritage, we have it on the authority of Wellington that “Waterloo was won on the playing fields of Eton.”
Fellowship Coronation Dinner-Dance.

This is our last opportunity to remind our members that the above function takes place on Friday, May 28th, at Claridges Hotel. Reception of guests commences at 8.30 p.m., dinner at 9 p.m. and dancing afterwards till 3 a.m. There will be a cabaret entertainment at midnight. Tickets, one guinea each (inclusive of dinner and running buffet during dancing), may be obtained from the Secretary, The Fellowship of Medicine, 1 Wimpole Street, W.1, or from any member of the Ladies' Committee.

Society of Apothecaries of London.

We are asked to inform our readers that the May Examinations for the Diploma of the Mastery of Midwifery will be held on Tuesday, Wednesday and Thursday, the 18th, 19th and 20th of May, instead of on the dates previously announced.

General Post-Graduate News.

It should be noted that instruction arranged by the Fellowship of Medicine is open only to Members and Associates unless otherwise stated. A copy of each detailed syllabus is sent to every Member and Associate. Information regarding the various Courses can always be obtained from the Office daily between 10 a.m. and 5.30 p.m. and on Saturdays between 10 a.m. and 12.30 p.m. (Telephone: Langham 4266.)

To ensure admission or to avoid cancellation of the Courses application must be made by the date given on each syllabus.

ADVANCED COURSES.

Dermatology: May 3 to May 29. St. John's Hospital. Afternoons. Fee £2 2s. Od. (Practical Pathology arranged. Fee £4 4s. Od.).

Thoracic Surgery: May 24 to May 29. Brompton Hospital. All day. Fee £5 5s. Od. (Limited to 12).

Urology: May 31 to June 12. St. Peter's Hospital. All day. Fee £5 5s. Od. (Limited to 8).

M.R.C.P.: June 1 to June 17. National Temperance Hospital. Tuesday and Thursday evenings at 8.00 p.m. Clinical and Pathological. Fee £6 6s. Od. (Maximum of 24).

M.R.C.P. (Chest): June 7 to July 3. Brompton Hospital. Two afternoons weekly, 5.00 p.m. to 6.30 p.m. Fee £3 13s. 6d. (Limited to 6 per class).

M.R.C.P. (Heart and Chest): June 9 to July 3. Victoria Park Hospital. Wednesdays and Fridays, 6.00 p.m. to 7.30 p.m. Fee £3 13s. 6d. (Limited to 6).

Gynaecology: June 14 to June 26. Chelsea Hospital for Women. All day. Fee £5 5s. Od.

M.R.C.P. (Tuberculosis): July 3. Preston Hall, Maidstone. All day. 11.0 a.m. to 6.00 p.m. Fee 10s. 6d. (Limited to 8). If sufficient demand, demonstrations repeated on July 10.

Proctology: July 5 to July 10. St. Mark's Hospital. All day. Fee £3 3s. Od.

M.R.C.P. (Fundus Oculi): July 6. West End Hospital for Nervous Diseases. 8.30 p.m. Fee 15s. 6d. (Limited to 12).

Urology: July 12 to July 31. All Saints Hospital. Afternoons and evenings. Fee £2 12s. 6d.

OTHER COURSES.

Chest Diseases (week-end): May 8 and May 9. Brompton Hospital. All day, Saturday and Sunday. Fee £1 11s. 6d.

Physical Medicine (week-end): May 22 and May 23. St. John Clinic and Institute of Physical Medicine. All day, Saturday and Sunday. Fee £1 1s. Od.

Children's Diseases (week-end): May 29 and May 30. Princess Elizabeth of York Hospital. Fee £1 11s. 6d.

Medicine (week-end): June 5 and June 6. Prince of Wales's General Hospital. All day, Saturday and Sunday. Fee £1 11s. 6d.
Obstetrics (week-end): June 12 and June 13. City of London Maternity Hospital. All day, Saturday and Sunday. Fee £2 2s. 0d.

Surgery (week-end): June 19 and June 20. Prince of Wales's General Hospital. All day, Saturday and Sunday. Fee £1 11s. 6d.

Heart and Lungs (week-end): July 3 and July 4. Victoria Park Hospital. All day, Saturday and Sunday. Fee £1 11s. 6d.

Dermatology: July 12 to July 24. Hospital for Diseases of the Skin, Blackfriars. Afternoons. Fee £1 1s. 0d.

STANDING ARRANGEMENTS.

Analgestics: Practical tuition for a fortnight or a month can be arranged. Limited to two Post-Graduates at a time.

Ante-Natal Clinics: (For Women Post-Graduates only). East Islington Mothers and Babies Welfare Centre. Tuesdays 10.30 a.m. to 12.30 p.m. Two Post-Graduates only per clinic. Fee 5/- a time. Arrangements must be made in advance with the Fellowship of Medicine.

Children's Diseases: The Hospital for Sick Children. Three terms of ten to twelve weeks. Instruction consists of out-patient work every morning in general medicine and surgery, and in the special skin, ophthalmic, and ear, nose and throat departments: Ward Visits in the afternoons, and on Wednesday a special lecture from 2.0 to 3.0 p.m., followed by clinical pathology from 3.0 to 4.0 p.m. Fees: One week, £1 11s. 6d.; two weeks, £3 3s.; one month, £5 5s.; two months, £7 17s. 6d.; three months or the full term, £10 10s. Special courses in Practical Pathology, consisting of six demonstrations, fee £3 3s. Tickets and full information may be obtained from the Fellowship of Medicine. (Open to non-Members). Next term: April 12 to July 17.

Chest:

Clinical Assistantships: Brompton Hospital. Tenable for 3 months; eligible for re-appointment. Candidates (men or women) will be attached to an In-Patient Physician and the corresponding Out-Patient Physician, to a Surgeon and/or to a Member of the Staff in charge of any Special Dept. They will be responsible for the performance of their duties to the Members of the Hon. Staff to whom they are attached, and may be required to undertake any special work which is considered desirable. Fees £5 5s. per 3 months or portion thereof. (Open to non-Members).

Artificial Pneumo-Thorax Course. Brompton Hospital. A Practical Course of twelve lessons, covering two to three weeks. Certificates of competency will be given on completion of Course. Fee £5 5s. 0d. Limited to 6 per class. (Open to non-Members).

Radiology: Instruction in the Screening and Interpretation of radiographs can be arranged covering 2 hours daily. Fee £3 3s. a week. Limited to 2 Post-Graduates at a time.

Venereal Disease: (For Women Post-Graduates only). Royal Free Hospital. Special Course extending over twelve weeks (not less than 130 hours attendance) entitling the Post-Graduate to a certificate which the Ministry of Health requires for any practitioner who desires to be in charge of a recognized V.D. Centre. Fee £21. (Open to non-Members).

Wellcome Museum of Medical Science: 183, Euston Road, N.W.1. Open daily 10.0 a.m. to 5.30 p.m. (Saturdays 10.0 to 12.30 p.m.) The whole range of medicine is set out in this museum, illustrated by drawings, charts and specimens. A copy of the guide-book and an introduction card may be obtained from the Fellowship of Medicine.

Panel of Teachers: Details of the daily clinics may be obtained from the Fellowship of Medicine. Fee 5/- per clinic.

A new and enlarged edition of the Guide Book, giving details of how to reach the various London Hospitals by tube, tram, or 'bus can now be obtained from the Fellowship. Price 6d. (Members and Associates, 3d.).
The Annual Meeting.

The Annual Meeting was held in the Council Chamber of the Royal Society of Medicine, 1, Wimpole Street, on 9th March, at 5.30 p.m. Mr. Herbert Paterson, Chairman of the Executive Committee, was in the chair.

The Chairman expressed the great regret of the Association at the death of their President, Lord Moynihan, who had been a Member of the Fellowship of Medicine since 1919 and President since 1932.

I.—Report by the Treasurer.

In presenting the Balance Sheet, which has already been circulated to Members, I think that very little explanation is needed. It is satisfactory to note that there is an excess of income over expenditure, even though it is only the small amount of £26. 1936 was not quite such a satisfactory year as 1935, but it is felt that this is partly due to the Silver Jubilee in 1935, which brought to England more than the normal number of overseas visitors.

It should be noted that the Reserve Fund has been increased by nearly £600. A profit of £252. 16. rd. was made on the sale of £850 Funding Loan 4% 1960/1990, and in its place £1,500 Surrey County Council 3% 16½/66 stock was purchased. The holding of National Savings Certificates has also been increased to the full amount permitted. Owing to the sale and purchase of stock the income from investments fell by £70, but this will be increased this year. It would seem therefore no over-statement to say that the Fellowship of Medicine is in a sound financial position.

2.—Report by the Honorary Secretaries.

Membership of the Fellowship of Medicine. At the end of 1936 the number of Members, Associates, and Overseas Subscribers to the Journal continued at a satisfactory level. The number is slightly less than at the end of 1936, but this is largely attributable to the fact that the Silver Jubilee in 1935 brought many overseas visitors to England. About two-thirds of the total members are practitioners resident in the British Isles.

Courses of Instruction. The Special Courses during the year were well attended. The number of post-graduates who attended the various courses, lectures, demonstrations, and clinics was over 600, of which number practitioners of the British Isles formed about half. The number of tickets for attendance at the special courses was nearly 1,200, while attendance at separate clinics, etc., was about 350. The F.R.C.S. (Final) courses, as always, were full and had a waiting list of applicants. The clinical and pathological courses for M.R.C.P. candidates were well attended. Special demonstrations for M.R.C.P. candidates, on the Fundus Oculi, and also special tuberculosis demonstrations at Preston Hall, Maidstone, were most successful. A course on Plastic Surgery was included during the year and proved popular. Lectures given during the year included a series on Endocrinology and on Diseases of Children, and a single lecture on "Present Day Treatment in the U.S.A. of gastric and duodenal ulcer," which was given by Dr. de Hellebrandth, of New Jersey. Evening courses on Anatomy and Physiology for the F.R.C.S. (Primary) were also given, and much appreciated by the candidates.
Provincial Lectures. A request was received from the Southampton Division of the British Medical Association for a further series of lectures to be arranged, and these were given in the autumn.

Supper-Dance. Nearly 200 people attended the Dance which was arranged for Members and their friends at Claridges on May 20th. From the comments received, the evening was evidently much enjoyed.

Advertising and Propaganda. The Fellowship of Medicine would like to express thanks to the Lancet and to the British Medical Journal for the regular insertion of weekly diaries and news paragraphs relating to the work of the Fellowship.

Distribution of Funds. During 1936 the total sum disbursed in respect of post-graduate tuition was £2,956. 19. 7d. This brings the total sum distributed by the Fellowship of Medicine since its inception in 1919 up to £35,273. 5. 3d.

Executive Committee. Mr. McNeill Love and Mr. Coyte have both retired from the Committee, and the Committee would like to take this opportunity of thanking them for the interest and help they have given. To Mr. McNeill Love very special thanks are due for his long and continued guidance in the activities of the Association.

Demonstrations and Lectures. The Executive Committee would like to take this opportunity of expressing their appreciation of the co-operation of the demonstrators and lecturers which has done so much to forward the work of post-graduate education.

3.—Election of Officers and Members of the Executive Committee.

The following gentlemen had been duly nominated and were unanimously elected:

President: Rt. Hon. Lord Horder of Ashford, K.C.V.O., M.D., F.R.C.P.
Chairman of Executive Committee: Herbert J. Paterson, C.B.E., M.C.
Honorary Treasurer: J. Swift Joly, F.R.C.S.
Honorary Secretaries: H. V. Morlock, M.C., M.D.; David Levi, M.S.

Members of Executive Committee:

Macdonald Critchley, M.D., F.R.C.P. J. P. Lockhart-Mummery, F.R.C.S.
Leonard Findlay, M.D., F.R.C.P. McKim McCullagh, D.S.O., M.C., F.R.C.S.
Kenneth Heritage, M.S.
Robert Hutchison, M.D., F.R.C.P. B. T. Parsons-Smith, M.D., F.R.C.P.

4.—Vote of thanks to the Royal Society of Medicine.

Dr. B. T. Parsons-Smith moved “That the Fellowship of Medicine desires to place on record its indebtedness to the President and Council of the Royal Society of Medicine for their continued generosity in putting rooms at the disposal of the Association, and also the best thanks of this meeting be conveyed to the Royal Society of Medicine for this assistance.”

The motion was seconded by Mr. David Levi and carried with acclamation.
And the danger of a full-blown neurosis grows with the length of time during which self-relief is practised.” This, certainly, is taking out a patent on both sides and leaves the reader in a state of confusion. The book is largely a farrago of inconsiderate statements, and “lying intimidations” of the reader’s reason. No wonder “the stupid and reactionary assertion” has been made, “to the effect that Sexual Science was a deliberate ‘cult of the Perverse’.”

One may well ask whither are we drifting in this field of propaganda in which the “reformers” are so vocal and prolific of pen? The dangers of ex cathedra statements are well known, but there are times when they need to be made. Where is the new leader to arise, Britain or America, who, not bred for years like Freud, in the prurient atmosphere of the Parisian clinics, will breathe the wind of sanity in this charnel house of psycho-analysis and sexual psychology?

THE CONTROL OF TUBERCULOSIS IN MAN.

By NATHAN RAW, C.M.G., M.D., M.R.C.P.
Baillièvre, Tindall & Cox. 1937. Price 6/-.

Dr. Nathan Raw has enjoyed very intimate and prolonged opportunities, both clinical and pathological, for the study of tuberculosis, and the conclusions he has formed, so far that is as they relate to the occurrence of bovine tuberculosis in man, he has presented in this book of some 120 pages. The summary is an admirable one, and its appearance is particularly opportune when the subject of the milk supply is engaging both public and professional attention.

Dr. Raw recognizes that the ultimate aim is the elimination of tuberculosis from milk yielding cows, but also that nothing like complete success in this direction is even in sight. Hence he insists that in the existing circumstances pasteurization is the only effective protective measure. To support these conclusions the story is told in detail and with due evidence in support. Given the position stated, and it cannot be seriously contested, there falls upon the medical profession as the guardian of the public health the duty of making the truth known. Hence the present book may be commended to practitioners, and all public health authorities might well be added to the congregation.

Among the finer points raised in the discussion particular attention is due to the chapter which deals with the protective and therapeutic value of immunization. The claim is made that by sub-culture of the bacillus continued over many years an attenuated vaccine is obtained which, the bacilli being killed by heat, is both-safe and effective; and this is a highly interesting and important aspect of Dr. Raw’s original work. We hope his book will have a wide circulation.

Forthcoming Medical Books.

HENRY KIMPTON, 263, High Holborn, W.C.1.

“*The Ocular Fundus in Diagnosis and Treatment.** By Donald T. Atkinson, M.D., F.A.C.S. Consulting Ophthalmologist to the Santa Rosa Infirmary and the Nix Hospital, San Antonio, Texas; Fellow of the American Academy of Ophthalmology and Otolaryngology; Life Member of the American Medical Association of Vienna; author of “External Diseases of the Eye.” In one large octavo volume of 142 pages, with 106 illustrations including 58 coloured plates. Cloth. Price 45s. net.

"Clinical Laboratory Diagnosis." By Samuel A. Levinson, M.S., M.D. Director of Laboratories, Research and Educational Hospitals, Chicago, Illinois; Associate Professor of Pathology and Bacteriology and Assistant Professor of Medicine, University of Illinois, College of Medicine and Robert P. MacFate, Ch.E., M.S. Assistant Director of Laboratories, Research and Educational Hospital, Chicago, Illinois; Associate in Pathology and Bacteriology and Instructor of Physiological Chemistry, University of Illinois, College of Medicine. In one royal octavo volume of 877 pages, illustrated with 144 engravings and 13 plates, 5 in colors. Cloth. Price 45s. net.

"Materia Medica, Toxicology and Pharmacognosy." By William Mansfield, A.M., Phr.D. Dean and Professor of Materia Medica and Toxicology, Union University, Albany College of Pharmacy, Albany, N.Y. In one large octavo volume of 707 pages with 202 illustrations. Cloth. Price 30s. net.

"Endocrinology. Clinical Application and Treatment." By August A. Werner, M.D. F.A.C.P. Assistant Professor of Internal Medicine, St. Louis University School of Medicine; Associate Physician, St. Mary’s Group of Hospitals; Physician Endocrine Clinic, St. Louis City Hospital; Staff Member, St. Louis City Hospital, Sanitarium and Infirmary; St. Louis Training School for Mentally Defective Children and the Missouri State Hospital No. 1, Fulton Mo. In one royal octavo volume of 672 pages, illustrated with 265 engravings. Cloth. Price 40s. net.

"Synopsis of Pediatrics." By John Zahorsky, A.B., M.D., F.A.C.P. Professor of Pediatrics and Director of the Department of Pediatrics, St. Louis University School of Medicine, and Pediatrician-in-Chief to the St. Mary’s Group of Hospitals; Fellow of the American Academy of Pediatrics, Assisted by T. S. Zahorsky, B.S., M.D. Instructor in Pediatrics, St. Louis University School of Medicine, and Assistant Pediatrician to the St. Mary’s Group of Hospitals. Second Edition. In one demy octavo volume of 367 pages. Cloth. Price 17s. 6d. net.

EDWARD ARNOLD & CO.,

"Thoracic Surgery," a revised and abridged edition of Sauerbruch’s "Die Chirurgie der Brustorgane," by Ferdinand Sauerbruch, Professor of Surgery in the University of Berlin and Laurence O'Shaughnessy, F.R.C.S., Hunterian Professor in the Royal College of Surgeons; Thoracic Surgeon to The British Legion Sanatorium, Preston Hall, The Grosvenor Sanatorium and The Ransom Sanatorium (Nottingham County Council); Honorary Consultant to the Lambeth Cardio-Vascular Clinic (London County Council). This English version of Prof. Sauerbruch’s well-known book is intended to describe to the ordinary surgeon how to perform thoracic operations, including many which have only been made possible by the most recent advances in technique. It also deals with the diagnosis and prognosis of those cases suitable for surgical treatment. It will run to about 400 pages, with 230 illustrations and 12 coloured plates. Extensive classified bibliography. Super Royal 8vo., 50s. net, ready late in June.
LIST OF OVERSEAS MEMBERS OF THE FELLOWSHIP OF MEDICINE AT PRESENT IN ENGLAND.

AUSTRALIA:

Dr. N. J. BONIN, London House, Caroline Place, W.C.1.
Dr. S. W. BRYAN, c/o Fellowship of Medicine.
Dr. W. S. CHARLTON, c/o E. S. & A. Bank Limited, 5, Gracechurch Street, E.C.3.
Dr. KEVIN R. CUSSEN, c/o Commercial Bank of Australia, 17, Moorgate, E.C.
Dr. DORA S. DAVIES, c/o E. S. & A. Bank, 5, Gracechurch Street, E.C.
Dr. R. B. DAVIS, Princess Elizabeth of York Hospital, Shadwell, E.I.
Dr. LORNE DODDS, c/o Queensland National Bank, 8, Princes Street, E.C.
