Fellowship of Medicine and Post-Graduate Medical Association

PRESIDENT:
The Rt. Hon. Lord Horder, G.C.V.O., M.D., F.R.C.P.

CHAIRMAN OF EXECUTIVE:
Herbert J. Paterson, C.B.E., M.C.

HONORARY TREASURER:
J. Swift Joly, F.R.C.S.

HONORARY SECRETARIES:
H. V. Morlock, M.C., M.D.
David Levi, M.S.

HONORARY EDITOR:
Ernest Fletcher, M.B., M.R.C.P.

ASSISTANT HONORARY EDITOR:
Ronald W. Raven, F.R.C.S.

EXECUTIVE COMMITTEE, 1937-1938:
Leonard Findlay, M.D., F.R.C.P.
Kenneth Heritage, M.S.
Robert Hutchison, M.D., F.R.C.P.
J. P. Lockhart-Mummery, F.R.C.S.
J. M. Woodburn Morison, M.D., F.R.C.P.
B. T. Parsons-Smith, M.D., F.R.C.P.
Charles Read, F.R.C.S., M.C.O.G.

SECRETARY:
Mona L. Worth.

(Office Hours: 10 a.m. to 5.30 p.m. Saturdays 10.0 a.m. to 12.30 p.m.)

The Post-Graduate Medical Journal is the official organ of the Fellowship of Medicine and Post-Graduate Medical Association.

Notice to Subscribers.

See special Blue Form inset in centre of Journal.

Notice to Contributors.

The Journal is intended for the publication of matter of special interest to the Post-Graduate. The substance of Lectures (either abridged or in extenso) as well as Reports of cases demonstrated to Post-Graduate students are specially invited.

Communications submitted for publication must be type-written. All illustrations should be in the form of positive prints with specific directions regarding their position in the text. Communications published become the property of the Journal and permission to re-publish must be obtained from the Editor.

Contributors will be supplied with one galley-proof; an allowance of ten shillings per sheet of 16 pages is made for corrections. Each contributor is entitled to fifty separate copies of his article (if the article has more than one contributor the fifty copies are divided among them). Extra copies may be had from the printer at a moderate charge.

All correspondence regarding the Journal must be addressed to the Honorary Editors, Fellowship of Medicine, 1 Wimpole Street, W.1., except that dealing with advertisements and business matters, which should be addressed to the Business Manager, Fellowship of Medicine and Post-Graduate Medical Journal, 404, Grand Buildings, Trafalgar Square, W.C.2. (Tel.: Abbey 6988).
Traumatic and Industrial Surgery.

During recent years traumatic and industrial surgery has come to occupy an important place in our activities consequent on the increasing mechanisation of industry and the development of methods of transportation. The majority of injuries must be regarded from both the medical and legal points of view. The December (1938) number of the American Journal of Surgery contains a helpful symposium on this aspect of surgery and an effort has been made to clarify relationships involved through workmen’s compensation and medico-legal problems in general. There are many useful contributions to this symposium and reference will be made to several of them.

G. L. Marston deals with medical reports and a perusal of his paper will certainly lead to an improvement in the type of medical report which is furnished to insurance companies by the medical profession in compensation cases.

A useful contribution is made by E. O’Dunne on “Medical Experts as Witnesses” and there are many practical points which will prove of value to the medical expert who testifies in court. Cerebro-cranial injuries are considered in some details. G. W. Swift, describes the conservative treatment of such injuries and states that shock is the first and most important factor to control. Later treatment includes the prevention of post-traumatic neurosis which, he states, should never be allowed to develop. Psychoses associated with cerebro-cranial injuries are the direct result of brain damage and cannot be prevented. Practical considerations in the treatment of these head injuries are dealt with by K. W. Ney. Fractures of the jaw and facial disfigurement are dealt with in two papers and the authors call attention to the value of simplicity of treatment with complete reduction and fixation. It is stated that compound fractures of the lower jaw should be drained by external incision. With most injuries of the soft tissue it is better to allow the wound to heal spontaneously. An interesting resumé is given concerning abdominal catastrophes resulting from external violence. There is a belief in some quarters that trauma can produce disease; others admit that trauma may aggravate pre-existing disease and others deny that any relationship exists between injury and disease. The contribution of H. H. Kessler on traumatic appendicitis is therefore of interest: he takes the view that it is highly improbable that trauma can initiate appendicitis and he gives certain criteria which must be satisfied before such a view can be accepted.

Full consideration is given in this symposium to problems connected with injuries of the back. J. D. Ellis discusses in detail the examination of these cases. He states that no special test for malingering is necessary for patients cannot, on repeated examination, maintain the limitations of movement and definite signs of the various injuries consistently. M. Edwards discusses injuries of the coccyx and coccygodynia and calls attention to the need of care in the interpretation of physical signs and radiological findings in these cases. He also states that conservative measures should be persisted with for longer periods than is generally the practice as excision frequently fails to effect a cure.
Injuries of the hand are considered in three useful articles. F. B. MacMillan deals with injuries to the carpal bones and describes a method of reduction and splintage of carpal fractures which gives excellent results. T. W. Harmer stresses the importance of giving attention to details in the treatment of hand injuries. Fractures of the bones of the upper and lower extremities are considered and W. R. Brewster states that internal fixation is the method of choice in dealing with fractures of the neck of the femur and intertrochanteric fractures. L. Mayer deals with certain details in connection with the repair of severed tendons and quotes Alexis Carrell—"Master of surgical technique" who stated that he considered the restoration of function to damaged finger tendons the most difficult of surgical problems.

An interesting paper is contributed on gas gangrene in which the authors have clarified the bacteriological principles underlying this disease. The various forms of treatment are enumerated and attention is drawn to the necessity of making an early diagnosis.

The practical surgeon and all who are interested in this important branch of medical practice will find much of value in this volume.

---

Centenary of the Medical Press and Circular.

The Medical Press and Circular was founded in Dublin by Dr. Arthur Jacob in January, 1839 under the title of the Dublin Medical Press. At the time of its foundation the profession was entirely unorganized and Dr. Jacob a distinguished anatomist and ophthalmologist whose name is still associated with "Jacob's ulcer" and "Jacob's membrane," was one of the first men to see the need for organization.

To mark its Centenary—celebrated socially last month in an appropriate manner—Dr. Robert J. Rowlette, who was for many years Irish Editor, has written a most interesting history of the Journal and its development and has woven into his account the medical history of the times.

Medical politics have always played a large part in the editorial policy of the Medical Press and Circular, but in recent years especially, the Journal has provided in concise and authoritative articles the latest accepted methods of diagnosis and treatment, and has continued to occupy a useful and influential place among current medical periodical literature.

---

FELLOWSHIP OF MEDICINE DEBATE:
STATE MEDICAL SERVICE.

A debate on the motion "That the institution of a whole-time State Medical Service would be in the interests of the Nation's Health" will be held on Friday, March 24th, at 8.30 p.m., in the Botanical Theatre, University College, Gower Street, W.C.1.

Mr. Somerville Hastings, M.P., F.R.C.S., will propose the motion, which will be seconded by Dr. D. Stark Murray. Sir Henry Brackenbury, M.D., will oppose the motion, supported by Dr. Frank Gray.

Attendance will be restricted to members of the medical profession, and admission will be by ticket (until March 1st issued only to Members and Associates of the Fellowship of Medicine, in priority of application). Application should be made to the Fellowship of Medicine, 1, Wimpole Street, W.1.
General Post-Graduate News.

It should be noted that instruction arranged by the Fellowship of Medicine is open only to Members and Associates unless otherwise stated. A copy of each detailed syllabus is sent to every Member and Associate. Information regarding the various Courses can always be obtained from the Office daily between 10 a.m. and 5.30 p.m. and on Saturdays between 10 a.m. and 12.30 p.m. (Telephone: Langham 4266.)

To ensure admission or to avoid cancellation of the Courses application must be made by the date given on each syllabus.

POST-GRADUATE COURSES, 1939.

Dermatology: February 1 to February 28. St. John's Hospital. Afternoons. Fee £1 1s. 0d. (Practical Pathology arranged, fee £4 4s. 0d.).

Chest and Heart Diseases (week-end): February 4 and February 5. London Chest Hospital. All day Saturday and Sunday. Fee £1 11s. 6d.

Proctology: February 6 to February 11. Gordon Hospital. All day. Fee £3 3s. 0d.

Children's Diseases (suitable for D.C.H.): February 20 to February 25. The Infants' Hospital. All day. Fee £3 3s. 0d. (Limited to 20).

M.R.C.P.: February 21 to March 9. St. Mary's Hospital. Tuesdays and Thursdays at 8.00 p.m. Clinical and Pathological. Fee £6 6s. 0d. (Limited to 24).

M.R.C.P. (Chest): February 27 to March 25. Brompton Hospital. Two afternoons weekly, 5.15 p.m. Fee £3 13s. 6d. (Limited to 6 per class).

Medicine, Surgery and Gynaecology: February 27 to March 11. Royal Waterloo Hospital. All day. Fee £3 3s. 0d.

Thoracic Surgery: March 2 to April 27. British Legion Headquarters, Eccleston Square, S.W.1. Thursdays at 8.30 p.m. Lecture Demonstrations on Surgery of the Heart and Lungs. Fee £2 12s. 6d.

M.R.C.P. (Chest and Heart): March 6 to March 24. Royal Chest Hospital. Mondays, Wednesdays and Fridays, at 8.00 p.m. Fee £4 14s. 6d. (£5 15s. 6d. to Non-Members).

Proctology: March 6 to March 11. St. Mark's Hospital. All day. Fee £3 3s. 0d.

F.R.C.S. (Final): Tuesdays, March 14 to May 2; Thursdays, March 16 to May 4 (excluding Easter holidays). Two separate Courses at 8.00 p.m. St. Mary's Hospital. Clinical and Pathological. Fee £7 7s. 0d. each Course. (Limited to 30 per Course).

M.R.C.P. (Tuberculosis): March 18. Preston Hall, Maidstone. All day, 11.0 a.m. to 5.0 p.m. Fee 10s. 6d. (Limited to 8). Demonstration will be repeated on March 25, if sufficient applications.

Urology (week-end): March 18 and 19. All Saints' Hospital. All day Saturday and Sunday. Fee £1 11s. 6d.

Ophthalmology: March 20 to March 31. Royal Eye Hospital. Afternoons. Fee £1 1s. 0d.

Gynaecology (suitable for M.C.O.G. or D.C.O.G.): March 20 to April 1. Chelsea Hospital for Women. All day. Fee £5 5s. 0d. (Limited to 20).

Fevers (week-end): March 25 and March 26. Park Hospital. All day Saturday and Sunday. Fee £1 11s. 6d.

M.R.C.P. (Fundus Oculi): March 28. West End Hospital for Nervous Diseases. 8.30 p.m. Fee 15s. 6d. (Limited to 12).

Children's Diseases (week-end): April 1 and April 2. Princess Elizabeth of York Hospital. All day Saturday and Sunday. Fee £1 11s. 6d.
STANDING ARRANGEMENTS.

Anaesthetics: Practical tuition for a fortnight or a month can be arranged. Limited to two Post-Graduates at a time.

Children's Diseases: The Hospital for Sick Children, Great Ormond Street. Three terms of ten to twelve Weeks Instruction consists of out-patient work every morning in general medicine and surgery, and in the special skin, ophthalmic, and ear, nose and throat departments Ward Visits in the afternoons, and on Thursday a special lecture from 2.0 to 3.0 p.m., followed by clinical pathology from 3.0 to 4.0 p.m. Fees: One week, £1 11s. 6d.; two weeks, £3 3s.; one month, £5 5s.; two months, £7 17s. 6d.; three months or the full term, £10 10s. Special courses in Practical Pathology, consisting of six demonstrations, fee £3 3s. Tickets and full information may be obtained from the Fellowship of Medicine. (Open to non-Members).

Chest: Clinical Assistantships: Brompton Hospital. Tenable for 3 months; eligible for re-appointment. Candidates (men or women) will be attached to an In-Patient Physician and the corresponding Out-Patient Physician, to a Surgeon and/or to a Member of the Staff in charge of any Special Dept. They will be responsible for the performance of their duties to the Members of the Hon. Staff to whom they are attached, and may be required to undertake any special work which is considered desirable. Fees £5 5s. per 3 months or portion thereof. (Open to non-Members).

Venereal Disease: London Lock Hospital, 91, Dean Street, W.1. Clinical instruction is available throughout the year. Fee £2 2s. 0d. per month. Application should be made to the Dean of the Hospital.

Wellcome Museum of Medical Science: 183, Euston Road, N.W.1. Open daily 10.0 a.m. to 5.30 p.m. (Saturdays 10.0 to 12.30 p.m.) The whole range of medicine is set out in this museum, illustrated by drawings, charts and specimens. A copy of the guide-book and an introduction card may be obtained from the Fellowship of Medicine.

Panel of Teachers: Details of the daily clinics may be obtained from the Fellowship of Medicine. Fee 5/- per clinic.

Ships Surgeons: Residential facilities available between voyages for those serving, or who have served, as Ship Surgeon to observe daily practice in wards and special departments of "Dreadnought" Hospital, Greenwich. No fees, nominal charge for board-residence. Apply the Secretary, Seamen's Hospital Society, Greenwich, S.E.10.

A new and enlarged edition of the Guide Book, giving details of how to reach the various London Hospitals by tube, tram, or 'bus can now be obtained from the Fellowship. Price 6d. (Members and Associates, 3d.).
better guide to practical routine Clinical Pathology. The preparation and examination of blood films, blood-cell counting, counting blood platelets, estimation of coagulation time, agglutination tests, the Wassermann reaction, blood chemistry—to take a few examples—are described and illustrated with admirable clarity.

The subject matter is remarkably up-to-date. Tests which in recent years have proved of real practical value are presented with the same care and lucidity as the older, well-known procedures. The account of the pregnancy test of Friedman, with its beautiful coloured plate and other illustrations, is particularly helpful. Nowhere have we seen better instruction, from the student’s point of view, of the staining and counting of reticulocytes, the blood sedimentation rate, blood typing, or tests for protein hypersensitiveness.

The book covers the whole field of Clinical Pathology, including the commoner biochemical investigations. There are excellent chapters, for instance, on blood chemistry, tests for liver function, renal function tests, and the examination of gastric contents. The practitioner will find all he need know of the application of laboratory methods to medicine.

Physicians are more interested in the nature of the pathological changes which the various laboratory procedures may reveal, and the interpretation of the results of such investigations, than in the minutiae of technique. The book is unusually helpful in this respect.

In every section the information is attractively presented. We have nothing but praise for the unusually fine illustrations; they have been chosen with care and are a most important feature. This work, by an art too subtle to be analysed, must reveal to any student the great fascination of clinical pathology. We believe it will have an enthusiastic reception.

---

The new home of Benger’s Food Ltd. is at Holmes Chapel—some 25 miles south of Manchester. This new factory has been built to provide accommodation for the manufacture of new pharmaceutical and medical products. The main frontage of the building contains on the ground floor, stock room, despatch and printing departments and on the upper floor, executive and general offices, laboratory and board room. The manufacturing processes and packing of Benger’s Food and other specialities are carried out in the rear portion of the factory. Among the features of the manufacturing section are the glazed white tiles, which surface the walls from ground to ceiling—an introduction which makes for brightness and cleanliness—the loftiness and spaciousness of all departments, the modern decorations and lighting and the red tiled floor which is laid throughout.

Messrs. Benger’s Food Ltd. welcome the visit of members of the Medical Profession who may be passing, at any time between the hours of 10 and 12, and 2 and 4 o’clock. Holmes Chapel is on the main road from the Potteries to Manchester.

For Bronchitis, Asthma, Emphysema and Bronchiecasis adjuvant in the treatment of sequælae of Influenza Messrs. Wilcox Jozeau market Eupnine Vernade in a palatable stable solution containing 10 per cent. of caffeine iodide.

Eupnine Vernade is the original product which exerts an intense action on the respiratory tract, stimulating the bronchial secretion and facilitating expectoration. It regulates and strengthens the heart, contracts the blood vessels of the splanchnic area, but dilates those of the heart and lung. Thus, although there is little nett change in the blood pressure, the circulation of the blood through the lungs is stimulated, thereby mitigating stasis. Eupnine Vernade also exerts a powerful diuretic action, thus diminishing the strain on the heart. An advantage is that Eupnine Vernade does not give rise to iodism and it
is palatable and stable, it is effective in small doses, thus rendering the cost of treatment relatively low; in the small size it is available at 2/4 and the large size at 4/-, less 10 per cent. professional discount.

"Epanutin" is a compound which whilst exerting a marked anti-convulsant action in epilepsy has relatively little hypnotic effect. Chemically, "Epanutin" is the sodium salt of 5.5 diphenyl hydantoin, and it is analogous to the barbiturates, being a derivative of glycolyl urea whereas the barbiturates are associated with malonyl urea. It is an odourless, white or cream-coloured powder, soluble in water, and has a bitter taste.

In clinical experiments* "Epanutin" has been shown to prevent, or greatly decrease, the incidence and severity of convulsive seizures in a substantial percentage of epileptics—without producing the hypnotic and narcotic effects exerted by many anti-convulsant drugs.

"Epanutin" is supplied by Parke, Davis & Company in bottles of 100 x 1½ gr. capsules. The dosage recommended for all cases of epilepsy over six years is one capsule before each of the three regular meals.

*The clinical evaluation of sodium diphenyl hydantoinate was the subject of a review by Putnam and Merritt of the Harvard Medical School and Boston City Hospital, Neurological Unit, at the annual meeting of the American Medical Association in June 1938.

We have received from Pharmaceutical Specialities (May & Baker) Ltd., a copy of another publication on M. & B. M. & B. 693. This 16 page booklet, in Gonococcal Infections 693 in Gonococcal Infections, is a complementary publication to "M. & B. 693 in Pneumococcal Infections," and "M. & B. 693 Biological and Biochemical Data."

We understand from the manufacturers that they delayed bringing "M. & B. 693" to the notice of venereologists until they were satisfied that the use of this product marked a real advance in the chemotherapy of that disease. This booklet which they have now produced represents the pooled results of observations in over 1,000 cases.

Copies of this publication are available medical practitioners on request to the manufacturers at Dagenham.

**Ty-phoo Tea**

is used in the homes of over 18,000 Doctors!

300 to 700 samples are sent daily to patients at the direction of medical men and women.

Delicious "Ty-phoo" is so mild and pure it will not harm the most delicate digestion. This because "Ty-phoo" possesses none of the bitter astringency which is so prevalent in the common coarse varieties.

For over 30 years "Ty-phoo" has retained the confidence of the medical profession as testified by the hundreds of letters which are upon our file.

Here is one to hand:

"I appreciate your excellent tea and I recommend it to patients in suitable cases with complete confidence."

Write to:

Sumner’s Ty-phoo Tea Ltd.,
BIRMINGHAM 5, for a FREE sample.

This offer applies only to the British Isles. We regret we cannot send "Ty-phoo" abroad.

Beware of Imitations!
