The Postgraduate Medical Journal is published on behalf of the Fellowship of Postgraduate Medicine by the BMJ Publishing Group.

The Journal, as the organ of the Fellowship of Postgraduate Medicine, is dedicated to advancing the understanding and practice of postgraduate medical education and training. The Fellowship of Postgraduate Medicine was founded after the First World War and was a pioneer in the UK in the development of programmes of postgraduate study in all branches of medicine (see Postgrad Med J 1985; 61:1). It has always been, and remains, independent of Government, Health Service and University. Currently the Fellowship works closely with the National Association of Clinical Tutors in furthering mutual aims. Amongst other activities, the Fellowship provides research grants and support for young investigators, especially those working temporarily in the UK.

Further details of the Fellowship of Postgraduate Medicine can be obtained from The Executive Secretary, Fellowship of Postgraduate Medicine, 12 Chandos Street, London W1M 9DE, UK.

The Journal is covered by Current Contents, Biological Abstracts, ASCA, ISI/BIOMED, Index Medicus, Excerpta Medica and Science Citation Index.

Editorial

Manuscripts, initial supplement enquiries, and all editorial correspondence should be sent to: The Editor, Postgraduate Medical Journal, 12 Chandos Street, London W1M 9DE, UK. (tel: +44 71 636 6334; fax: +44 171 436 2535).

Advertisements

Enquiries concerning advertisements should be addressed to: The Advertisement Manager, Postgraduate Medical Journal, BMA House, Tavistock Square, London WC1H 9JR, UK (tel +44 171 383 6339).

Publisher

All business correspondence and reprint requests should be addressed to Postgraduate Medical Journal, BMJ Publishing Group, BMA House, Tavistock Square, London WC1H 9JR, UK (tel +44 171 383 6668).

Subscriptions

Postgraduate Medical Journal is published monthly. The annual subscription rates are £135 worldwide. Orders should be sent to the Subscription Manager, Postgraduate Medical Journal, BMA House, Tavistock Square, London WC1H 9JR. Orders can also be placed with any leading subscription agent or bookseller. Subscribers may pay for their subscriptions by cheque (payable to British Medical Journal) or by Access, Visa, or American Express by quoting on their order the credit or charge card used, together with the appropriate personal account number and the expiry date of the card. (For the convenience of readers in the US subscription orders with or without payment ($213) may also be sent to British Medical Journal, PO Box 408, Franklin, MA 02038, USA. All enquiries, however, must be addressed to the publisher in London.)

Stress

This is a short book written in an informal style and obviously based on a relatively recent acquaintance with the life of junior hospital doctors. The material is presented in a non-technical and unsophisticated way, but obviously deliberately so. There is repetition of the difficulties doctors have in recognising stress in themselves and others, and in being sympathetic and supportive rather than the more typical response of discerning weakness. Institutional causes are also given appropriate recognition; long hours of work, lack of peer and senior support, and relocation every six months precluding relationships which acknowledge weaknesses as well as strengths. Suggested strategies of coping emphasise acknowledgement of stress, a life away from work, seeking those with whom one can discuss problems, the need for self-care (?self respect), and skills in delegation, time management, and problem solving.

Neither the diagnosis nor the suggested treatment is new. Despite the optimistic tone one is left, as is the author, with a quite disheartening feeling that there is unlikely to be any major reduction of the unreasonable demands on junior doctors by ‘the system’ or senior colleagues. One then wonders to whom this book should best be addressed. A junior doctor who buys it because of stress might find it describes the problem without providing sufficient relief. Perhaps it might more profitably be read by consultants and those responsible for undergraduate teaching who might feel the need to do more to make the role of the junior doctor an enjoyable educational experience.

INSTRUCTIONS TO AUTHORS

The aims of the Postgraduate Medical Journal are three-fold. Firstly, to help doctors in training to acquire the necessary skills to enable them to deliver the highest possible standards of patient care. Secondly, to help the trainers to develop suitable training programmes for their trainees. Finally, once that training is completed, to allow these doctors to maintain those high standards by a process of continuing medical education.

To achieve these aims we publish original papers, short reports and commissioned editorials and review articles. We are also delighted to receive unsolicited editorials and reviews, from doctors and others. The Postgraduate Medical Journal peer reviews all the material it receives. Each issue also includes a Self-Assessment section. Letters to the Editor, book reviews and an international postgraduate diary. Many issues contain papers or abstracts of symposia devoted to a single subject, and the full proceedings of meetings may be published as supplements to the Journal. The Postgraduate Medical Journal is published monthly in the English language, and has an international readership.

Typescripts
Three complete copies should be sent to the Editor, Postgraduate Medical Journal, PO Box 86, Church St, Oxford, OX1 2AJ, UK. Papers must be typed - single-spaced, on one side of paper not larger than A4 (297 mm × 210 mm). The first page of the typescript should bear the names of the author(s) and the name and address of the laboratory or institution where the work has been carried out, in addition to the title of the paper. The full address, telephone and fax number of the principal author to whom proofs will be sent should be given, together with up to three key words or phrases suitable for use as index terms. All abbreviations and symbols should be defined in the text. All material submitted is assumed to be submitted exclusively to the Postgraduate Medical Journal unless the contrary is stated. Papers may be returned if presented in an inappropriate form. If the paper is rejected, these copies will not be returned.

The principal author
The principal author must ensure that any co-authors listed agree to submission of the typescript. Any written or illustrative material which has been or will be published elsewhere must be duly acknowledged and accompanied by the written consent of the authors and publishers concerned.

Style
Abbreviations and symbols must be standard and SI units used throughout except for blood pressure values which are reported in mmHg. Acronyms should be used sparingly and fully explained when first used. Whenever possible, drugs should be given their approved generic name. Where a proprietary (brand) name is used, it should begin with a capital letter. Statistical analyses must explain the methods used. Words to be italicized should be underlined. The Concise Oxford English Dictionary is used as a reference for spelling and hyphenation. Illustrations and tables should be referred to in the text.

Articles
Original articles are usually up to 3000 words long with up to six tables/illustrations and 30 references. They should be divided into:
(a) Title page, (b) Summary, (c) Introduction, (d) Materials and Methods, (e) Results, (f) Discussion, (g) Acknowledgements, (h) References, (i) Tables. (j) Figures and captions. The summary should not exceed 250 words and should state concisely what was done, the main findings and how the work was interpreted. Numbered paragraphs should be avoided. The use of boxes with learning/summary 'bullet' points is encouraged.

References
References should follow the Vancouver style. In the text, they should appear as superscript numbers starting at 1. At the end of the paper they should be listed (double-spaced) in numerical order corresponding to the order of citation. All authors should be quoted for papers with up to six authors; for papers with more than six authors, the first three only should be quoted followed by et al. Titles of medical periodicals should be given in full or abbreviated in line with the latest edition of Index Medicus. The first and last page numbers for each reference should be provided. Abstracts and letters must be identified as such. For example,

Responsibility for the accuracy and completeness of references rests entirely with the authors.

Figures and tables
Photographs, photomicrographs, line diagrams and graphs should be prepared to professional standards and submitted as originals or as unmounted glossy photographic prints. When preparing illustrations which include lettering or symbols, remember they will be reduced to 65 mm in width, or less. Three copies of each illustration should be submitted, each bearing a label on the back marked in pencil with the author’s names and the number of the figure. Figure legends and tables should be typed on separate sheets. If any tables or illustrations submitted have been published elsewhere, written consent to republication should be obtained by the author from the copyright holder the authors. Figures and tables should be numbered in arabic numerals.

Short reports
Short papers or case reports should not exceed 1000 words, inclusive of abstract, introduction, report and discussion. Up to 10 references and two illustrations or tables will be accepted. Each report must include (on a separate sheet) a list of learning or summary points.

Self-assessment questions
Self-assessment questions may take several formats, including multiple-choice questions, (each consisting of a question stem and five items, with discussion of the correct answers and up to five references per question) and photographic material (eg, clinical photograph, X-ray, blood film, histological section) or data interpretation (eg, ECG, arterial blood gases), with clinical information and up to three questions with discussion of the correct answers, and up to five references per case. Authors whose case reports are rejected may be asked to consider resubmitting their report as a self-assessment question.

Review articles
The Editor welcomes review articles of up to 3000 words, provided they contain a clear educational message. The use of boxed case histories, learning/bullet points and structured tables/summaries are encouraged. Guidelines for authors of review articles are available from the Editorial Office, who are also happy to discuss proposed articles.

Editorials
The Editor is delighted to consider for publication unsolicited editorials of 800 words. These will be peer reviewed.

Covering letter
The covering letter must be signed by all authors and include a declaration that the paper is not under consideration by any other journal at the same time and that it has not been accepted for publication elsewhere.

Peer review
All papers are peer reviewed. Some are rejected after review by one or more members of the editorial team. The remainder are also reviewed by one or more external advisers. Reasons for rejection will be indicated to the principal author. The Editor retains the customary right to determine style and, if necessary, to shorten material accepted for publication.

Letters
Letters to the Editor related to articles published in the Postgraduate Medical Journal are welcome. Only one copy need be sent, which should not exceed 500 words and five references. Authors whose short reports are rejected may be asked to consider resubmitting their report as a letter.

Supplements
Guidelines for supplements are available from the Editorial Office, who are happy to discuss proposed supplements.

Proofs
A marked copy of the proofs will be sent to the principal author which should be read carefully for errors. The corrected copy must be returned to the Technical Editor within three days. Major alterations to text cannot be accepted.

Copyright assignment
The principal author must complete and return to the Publisher the Copyright Assignment Form enclosed with the proofs. He/she is responsible for obtaining the signatures of all co-authors.

Obligations
Obligations may be ordered on a form accompanying the proofs. The charges are necessarily high if orders are received after the issue has gone to press.
