*Acidophilus
Therapy*

B. ACIDOPHILUS-EMULSION (MORGENSTERN)

MORBACT

A concentrated, stable, homogeneous, and
∴ ∴ palatable emulsion of ∴ ∴

B. ACIDOPHILUS (about 250 millions per c.c.)

AGAR-AGAR, PETROLAT. liq. (heavy) SACCH., flavouring.

Indicated in Constipation, Intestinal Stasis with Chronic
intestinal putrefaction, etc.

While the *B. bulgaricus* cannot establish itself as an inhabitant of the intestinal tract and soon dies off, the *B. acidophilus*, being a native of the bowel, very quickly establishes itself in its normal habitat and multiplies freely.

B. ACIDOPHILUS-EMULSION will acidophilise the intestinal tract and thus correct putrefaction characterised by flatulence and foetid faeces.

Send for Booklet, "Intestinal Stasis and Toxæmia."
