THE STHENIC CONDITION

The magnesium deficiency of modern diet is associated with states of impaired health, lowered vitality and asthenia, and also in high probability with certain pathological conditions. Halmagon is a carefully devised formula of the halogen compounds of magnesium in tablet form, given in a single daily dose, which makes good the deficiency of magnesium in the food-intake. Its administration prevents and corrects the results of this deficiency.

ITS ACTION IS ACCOMPANIED BY A HEIGHTENED FEELING OF WELL-BEING AND INCREASED MENTAL AND PHYSICAL EFFICIENCY—THE STHENIC CONDITION.
