(New Series)

MAY, 1935.

Monthly. Price 2s. net.

**H**UMANISED TRUFOOD is composed of the nutritive constituents of pasteurised Cow's Milk, split up and re-combined in the proportions found in normal Breast Milk, with other food factors which occur in Breast Milk added. The milk is dehydrated at a low temperature which permits the emulsified condition of the fat and the colloidal state of the proteins to be retained, and does not destroy the active enzymes. A complete food, of the composition and character of Breast Milk, is thus provided for the infant.

## HUMANISED TRUFOOD
