# Pituitrin

*A Step Forward*

INTRODUCED by Parke, Davis & Co. in 1908, Pituitrin has for over 18 years occupied a foremost place in medicine. Although attempts to isolate the active principle, or principles, of the pituitary gland have not, as yet, been quite successful, Parke, Davis & Co. workers have recently succeeded in producing Pituitrin in a much higher degree

of purity than was hitherto possible.

We believe that Pituitrin contains less protein than any other pituitary extract available. The consequent reduction in the amount of solids and the quantity of protein in each dose injected is important—not less so is the greater stability and uniformity of therapeutic action this improvement secures.

*Pituitrin is supplied  
in ampoules of 0.5 cc. or 1 cc.  
in boxes of 6 or 12 ampoules.*

*A Booklet on  
Pituitrin Therapy will be sent to  
Physicians on request.*

Parke, Davis & Co., 50-54 Beak St., London, W.1
