Acidophilus Therapy

B. ACIDOPHILUS EMULSION (MORBACT)

is a concentrated stable emulsion of BACILLUS ACIDOPHILUS in Agar and Mineral Oil. There are more than 250,000,000 viable B. Acidophilus per c.c., and the preparation is unequalled for the treatment of chronic cases of

INTESTINAL STASIS

The enquiry is sometimes made whether the B. Acidophilus is viable for any length of time. Accordingly we made on May 23rd a test of one bottle from every batch made for five months.

In every case a pure culture of B. Acidophilus was recovered, with the exception of one batch made on April 11th, in which the bottle examined was contaminated with a non-pathogenic organism. In spite of this, however, the B. Acidophilus was flourishing.
