

in Staphylococcal Infection

QUINOLOR SQUIBB

*A unique
antiseptic agent*

MADE IN ENGLAND
In jars of 1 oz. and 16 oz.
Samples and Literature on
request.

An ointment of proved value in staphylococcal infection, particularly good results are to be obtained in sycosis barbae, sycosis vulgaris and tinea sycosis. "Quinolor" possesses noteworthy qualities for promoting tissue repair and affords an excellent dressing for cutaneous affections and superficial lesions. The antiseptic action continues over a considerable period of time, although the advantages associated with frequent dressings should not be overlooked. "Quinolor" Compound Ointment is applied to the affected area following a thorough cleansing of the wound. Impetigo Contagiosa is among other dermatological conditions which have frequently responded very favourably to "Quinolor" therapy.
