

Two advances in Opiate Medication

DILAUDID

Trade Mark

dihydromorphinone

Brand

Improved Morphine Preparation

Whilst the analgesic power of "Dilaudid" is five times as great as morphine, its hypnotic effect is considerably weaker. The euphoric element is largely subdued and the risk of addiction correspondingly lowered. Tolerance is greatly improved, an increase of dosage rarely necessary. The effect on peristalsis is slight and much less persistent than in the case of morphine.

In oral and hypodermic tablets, ampoules and suppositories

DICODID

Trade Mark

dihydrocodeinone

Brand

Powerful Antitussive

Occupying a place midway between morphine and codeine "Dicodid" exerts a specific and selective action on the cough centre. The absence of any notable constipating effect is responsible for the use of "Dicodid" as a post-operative analgesic. Better tolerated than morphine, "Dicodid" also interferes very much less with expectoration.

In oral tablets and ampoules
