WEST LONDON HOSPITAL**

CONTINUOUS INSTRUCTION. CLINICAL WORK in all DEPARTMENTS.
CLINICAL ASSISTANTSHIPS. SPECIAL ANNUAL MEMBERSHIP.
TERMS FOR GENERAL PRACTITIONERS. ANÆSTHETIC COURSE.

Prospectus from Sir HENRY SIMSON, K.C.V.O., Dean WEST LONDON HOSPITAL, HAMMERSMITH, W.6

THE HOSPITAL FOR SICK CHILDREN, Great Ormond St., W.C.1.

This Hospital contains 254 beds, with an average admission of 5,000 in-patients per annum; whilst in the Out-patient Department about 25,000 new patients are seen each year. The Medical School is recognised by the Universities of Oxford, Cambridge, and London, and by the Conjoint Medical Board of England, as a teaching institution where two months' clerking and dressing may be carried out by any undergraduate student who is entering for a final qualifying examination. In addition, for students who have completed four years of medical study, six months of the fifth year may be spent there in clinical work under recognition from the Conjoint Board. Post-graduate instruction, open to all qualified medical men and women, is given daily in the wards, out-patient department, operating theatre, and *post-mortem* room by members of the visiting staff. In addition, lectures are arranged for them throughout the year, announcements of which are made from time to time, and full details of them can be obtained from the Dean or Secretary at the Hospital. Clinical clerkship in the wards and clinical assistantships in the out-patient department are also available for post-graduate students. Opportunities for study are also offered in the Ophthalmic, Aural, Dermatological, Dental, Radiographic, and Pathological Departments.

Fees for Hospital Attendances.—One Month's Ticket, £2 2s. Three Months' Ticket, £5 5s. Perpetual Ticket, £10 10s.

Special reduced fee for Clinical Clerks, Dressers for one month's attendance, £1 1s. Clerks attend for about four hours daily.

Pathological Department.—Facilities are afforded to post-graduates for obtaining theoretical and practical instruction in Clinical Pathology and Bacteriology, and in Medical Biochemistry in the Pathological and Biochemical Laboratories.

Courses of 8 to 10 Lecture Demonstrations are given at weekly intervals twice a year in both subjects (Clinical Pathology and Bacteriology, and Biochemistry). These Lecture Demonstrations are of one or two hours' duration.

Fees.—For Course of 8 to 10 Laboratory Demonstrations in either Branch £5 5 0
For Combined Course of (a) Clinical Pathology and Bacteriology and (b) Medical Biochemistry £8 8 0

JAMES McKAY, Secretary.

ERIC I. LLOYD, F.R.C.S., Dean of the Medical School.

MANUAL OF EMERGENCIES

Medical, Surgical, and Obstetric; their Pathology, Diagnosis and Treatment.

By J. SNOWMAN, M.D., M.R.C.P.(Lond.)

SECOND EDITION.

Crown 8vo, pp. viii + 361.

10/- net, post free 10/6.

Considerable changes have been made in the second edition of this work in order to make it of real practical value to the Practitioner in emergencies. The size has been reduced to $4\frac{1}{2}$ in. x $7\frac{1}{4}$ in. so that it can be slipped in the pocket for consultation at any time. Superfluous matter has been deleted and black type used for headings, etc., so that no time may be lost in finding a particular reference. The price has been greatly reduced.

ACKNOWLEDGED the World's Best HONEY

NEW ZEALAND "Imperial Bee" HONEY is guaranteed to be untouched by hand from hive to jar, and is collected under strict hygienic supervision.

A doctor, who says that he prescribes an average of a ton of honey per year in diet for his patients, says:—

"No honey should ever be heated above hive temperature as the heating releases the vitamins, precipitates the minerals and kills the action of the enzymes."

NEW ZEALAND Imperial Bee Honey

is never subjected to sufficient heat to destroy the valuable food properties. "Clear" liquid honey has in most cases been subjected to extreme heat; honey cannot be exported from NEW ZEALAND in a liquid condition, nor is it so sold in Europe.

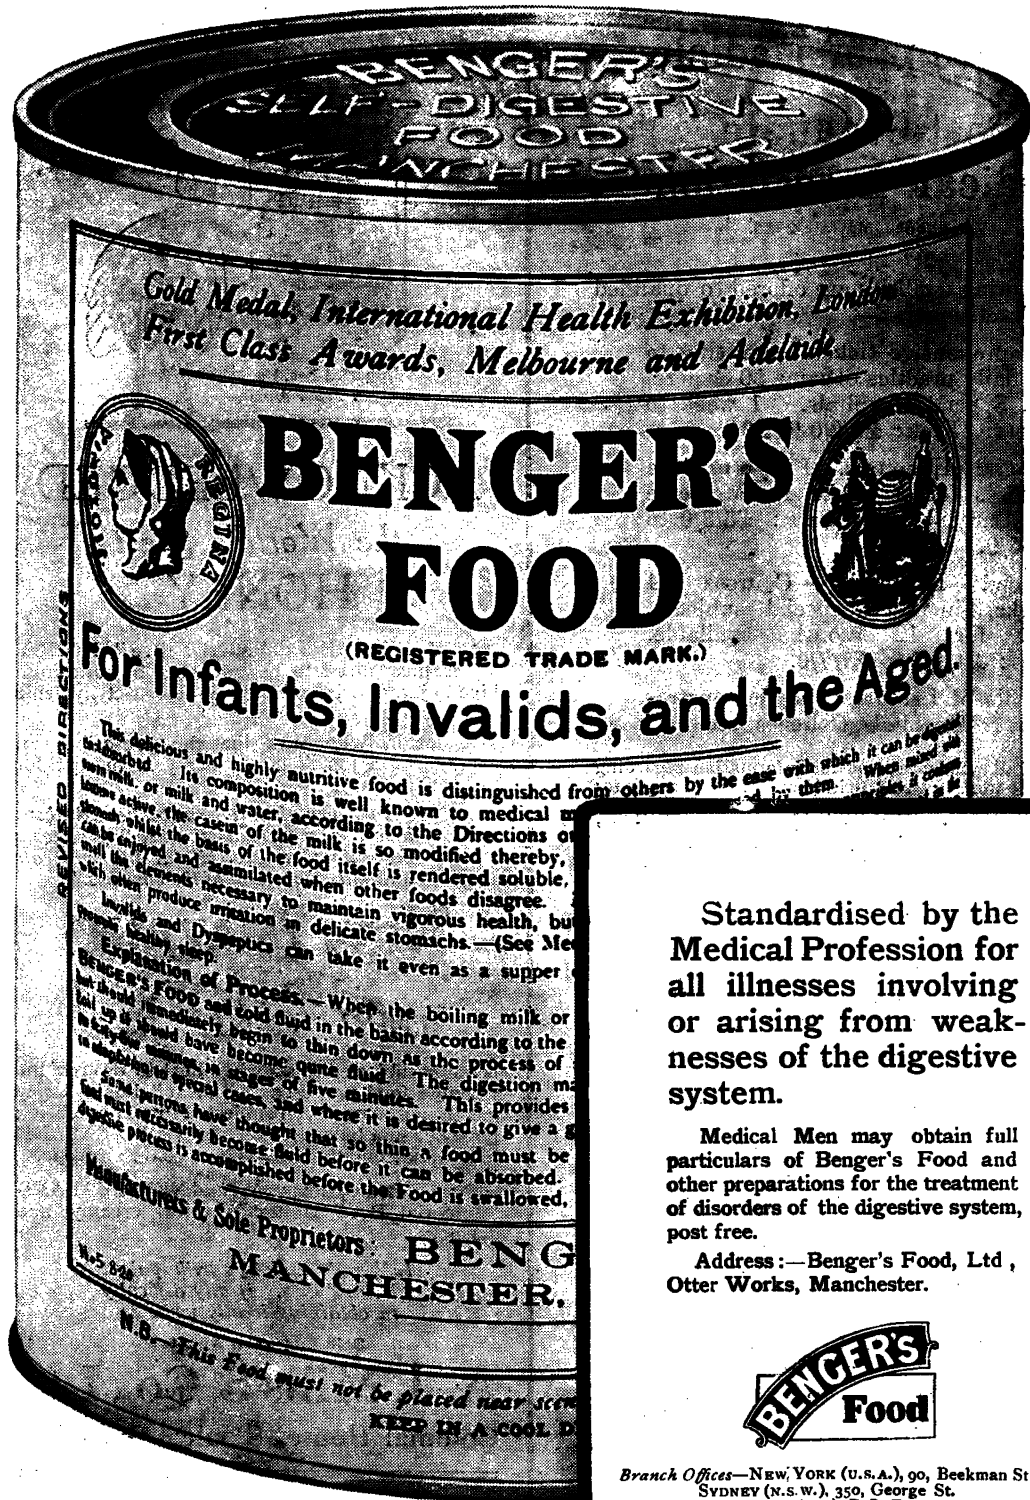

Pure, unheated honey sets, and NEW ZEALAND "Imperial Bee" Honey is thick, creamy and delicious.

In ½'s, 1's and 2½'s with patent "Netur" Cap. If any difficulty in obtaining locally write to

BENGER'S FOOD

(REGISTERED TRADE MARK.)

For Infants, Invalids, and the Aged.

The delicious and highly nutritive food is distinguished from others by the ease with which it can be digested. Its composition is well known to medical men, and its use is recommended by them. When mixed with warm milk or milk and water, according to the Directions on the label, the casein of the milk is so modified thereby, that it can be enjoyed and assimilated when other foods disagree. It contains all the elements necessary to maintain vigorous health, but which often produce irritation in delicate stomachs. — (See Medical Authorities and Dyspeptics can take it even as a supper.)

Explanation of Process.—When the boiling milk or Benger's Food and cold fluid in the basin according to the label should immediately begin to thin down as the process of digestion has already begun to take place. The digestion must be allowed to continue in a basin of water for five minutes. This provides the most delicate and assimilable form of the food. In some cases, persons have thought that so thin a food must be diluted with water, but it is not necessary to do so. The food must necessarily become fluid before it can be absorbed. In some cases, persons have thought that so thin a food must be diluted with water, but it is not necessary to do so. The food must necessarily become fluid before it can be absorbed. In some cases, persons have thought that so thin a food must be diluted with water, but it is not necessary to do so. The food must necessarily become fluid before it can be absorbed.

Manufacturers & Sole Proprietors **BENG MANCHESTER.**

Standardised by the Medical Profession for all illnesses involving or arising from weaknesses of the digestive system.

Medical Men may obtain full particulars of Benger's Food and other preparations for the treatment of disorders of the digestive system, post free.
