

prescribing vitamins in psychiatry ?

Acute psychiatric emergencies characterised by confusional states, the secondary effects of alcoholism, and drug withdrawal syndromes are all indications for high doses of vitamins of the B complex and C in the form of Parentrovite. This is only one of the many vitamin specialities produced by Vitamins

Limited. The Company has been conducting research into, and development of, vitamins for more than 40 years and is now the acknowledged leader in this field. As a result, Vitamins Limited offer an unrivalled range of preparations covering a wide variety of indications.

VITAMINS FROM VITAMINS LIMITED UPPER MALL LONDON W6

PRESCRIBING COSTS *In no case is the cost of a Vitamins Limited preparation greater than that of the official equivalent preparation and in some cases it is less. There is no official equivalent to some Vitamins Limited specialities.*

A PART OF THE PICTURE

Very much a part of the picture of a successful career is the security provided by the specially designed insurance policies of the **MEDICAL SICKNESS SOCIETY.**

From the early days of General Practice, on through all the stages of a Medical or Dental career, the essential security of insurance is provided by policies devised by the Society that belongs to the Medical and Dental professions.

Besides the well known, long term, permanent
SICKNESS AND ACCIDENT POLICIES
with bonuses allotted irrespective of claims,
the Society offers:

LIFE ASSURANCES

Whole Life, Endowment, Family Income, Educational, and Children's Deferred Policies.

PENSION POLICIES

and, of course,
The Foundation Policy for Students and Newly Qualified Practitioners.

CAR FINANCE

Through our Subsidiary Company

Proceedings
Second International Congress of
NEPHROLOGY

Prague, August 1963

■ 844 pages ■ 506 figures ■ 162 tables ■ cloth bound

Nephrology has, in its short history, metastasised to cover the whole of biological knowledge so that a single investigator can hardly manage the entirety. This Volume provides valuable data to the full extent of nephrological developments in the laboratories of the world.

CONTENTS

1. Nephron and the kidney
2. Renal circulation
3. Tubular transport
4. Regulation of the excretion of sodium and other electrolytes
5. Long-term treatment of chronic renal failure
6. Renal transplantation (Round Table Discussion)
7. Toxaemia of pregnancy
8. Chronic pyelonephritis
9. Renal hypertension
10. Report from the C.I.O.M.S. symposium on aldersterone
11. Normal morphology and enzymology of the kidney
12. Pathological morphology of the kidneys
13. Renal immunology
14. Renal physiology
15. The mechanisms of concentration of the urine
16. Pathology of body electrolytes
17. Kidneys and calcium
18. Pathophysiology of uraemia
19. Clinical topics
20. Miscellaneous
