SHOCK

Introduction	493
A. PATON	
Shock—the clinical problem in perspective	494
G. K. MCGOWAN	
Circulatory patterns in clinical shock	497
G. WALTERS	
The use and limitations of isotope studies in clinical shock	503
M. D. A. VICKERS	
The significance of central venous pressure and cardiac output measurements in shock	506
J. F. RIORDAN, W. D. S. MCLAY AND G. WALTERS	
Endotoxin shock—distinct entity or universal accompaniment?	514
W. M. MEE	
Tissue hypoxia and metabolic acidosis—significant factors?	518
J. S. S. STEWART	
Sympatho-adrenal hyperactivity—the key to irreversible shock?	523
M. H. IRVING	
The microcirculation in shock	530
N. A. MATHESON	
Volume expansion and flow promotion in shock	534
U. F. GRUBER	
Coagulation disturbances in shock	539
H. G. LASCH	
Metabolic and tissue effects of prolonged catecholamine infusion	545
W. K. ELTRINGHAM, M. E. JENNY AND A. P. MORGAN	
Haemovascular changes in septic shock	551
A. LITTON	
The effect of environment on the response to injury in the rat	555
H. B. STONER	
Local and general responses to injury in the newborn rabbit	559
R. A. LITTLE	
Shock and active vasodilatation in skeletal muscle	563
D. N. WALDER	
The role of the liver in the development of lactic acidosis in low flow states	566
R. SCHRÖDER, W. K. ELTRINGHAM, J. R. W. GUMPERT, M. E. JENNY, J. R. PLUTH AND R. M. ZOLLINGER, JR.	
Is there a place for proteinase inhibition? A review of the literature	571
G. D. LISTER	
Books received; Book review	576
