

CLINICAL METHODS. By Robert Hutchison, M.D., F.R.C.P., Physician to the London Hospital and to the Hospital for Sick Children, Great Ormond Street, and Donald Hunter, M.D., F.R.C.P., Assistant Physician to the London Hospital. Ninth edition. London: Cassell and Co., Ltd. 1929. Price 12s. 6d. net.

This work, which first appeared in 1897, has been known to a generation of students as "Rainy and Hutchison." In the present edition Dr. Hunter has collaborated with Dr. Hutchison in bringing the book thoroughly up to date, but it has been kept at the old convenient size by eliminating out-of-date material. There are some new figures and four new plates showing bacteria, reticulocytes, *Schistosoma hæmatobium* and *Schistosoma mansoni*.

The chapter on bacteriological investigation has been entirely rewritten by Dr. G. T. Western. There are many other changes in this edition, especially in the chapters dealing with the nervous system and the examination of pathological fluids.

It seems hardly necessary to review so deservedly popular a book, and the present edition even surpasses its predecessors and is one which no student can afford to be without.

We beg to remind our readers that a subscription of ten shillings per annum entitles them to become *Members of the Fellowship of Medicine*. Every Member gets this Journal post free for the year of his subscription, and he also receives any "Special Announcements" of lectures, demonstrations, &c., taking place at the various hospitals, general and special. Subscription for the Journal only is 6s. per annum.

Intending members should apply to the Secretary of the Fellowship of Medicine (Room 28), 1, Wimpole Street, W.1, either sending their subscription of ten shillings or asking for a Bankers' Order.
