Journal of Immunogenetics

Edited by K. Bauer *Heidelberg*

The purpose of this new journal is to provide a medium for the rapid publication of research papers and review articles of high quality in the field of immunogenetics. Its scope includes the immunogenetics of antigens, such as proteins, histocompatibility and blood group antigens; of antibodies as well as the ontogenetic development and the evolution of immunoglobulins, the immune response and the complement system. Other topics will include the genetics of tolerance-induction and of membrane antigens of the immunocyte.

Volume 1, Number 4, August 1974

W. H. Price, Irene M. Newlands and Th. Ferguson: Immunoglobulin levels in subjects with sex chromosome abnormalities

Ken Furukawa, Hisao Takizawa and Shoei Iseki: A family case of blood group B variants

Alena Lengerova, Jana Pêknicova and Zora Pokorna: Structural relationships between individual H-2 specificities on the cell surface

J. H. Edwards: HL-A and disease. The detection of associations

C. H. J. Ford and M. W. Elves: The production of cytotoxic antileucocyte antibodies by parous sheep

Nobuhiko Tada, Katsuhiro Iwano and Shigeo Iwano: The antibody response in inbred rats

H. W. Kunz, Th. J. Gilman and Th. J. Gilman: The immune response to poly(Glu⁵²Lys³) in inbred rats

H. W. Kunz and Th. J. Gilman: Antigenic aggregation on the antibody receptor

B. Cinader: Six years of experience with the murine model of systemic lupus erythematosus

Journal of Immunogenetics is published quarterly, Volume 1, Number 4, August 1974, £10.00 (US \$25.00) annum post free
