CONTENTS

NEW SERIES Vol. 45 No. 176 January 1976

(Vol. 69 of the continuous series)

Necrosis, Haemorrhage and Complement Depletion Following Bites by the Spitting Cobra (*Naja nigricollis*). *D. A. Warrell, B. M. Greenwood, N. McD. Davidson, L. D. Ormerod, C. R. M. Prentice.*

The Nature and Incidence of Cryoproteins in Hepatitis B Antigen (Hb₈Ag) Positive Patients. *Rawle M. McIntosh, Michael N. Koss, David J. Gocke.*

Intestinal Lymphangiectasia: the Variability of Presentation. A Study of Five Cases. *Susan H. Roberts, Adrian P. Douglas.*

Urate Kinetics in Hypoxanthine-Guanine Phosphoribosyltransferase Deficiency: Their Significance for the Understanding of Gout. *B. T. Emmerson, R. B. Gordon, L. A. Johnson.*

Effect of Concomitantly Administered Drugs on the Control of Long Term Anticoagulant Therapy. *J. R. B. Williams, J. P. Griffin, Anne Parkins.*

Serum Ionized Calcium and Parathyroid Hormone in Renal Stone Disease. *F. P. Muldowney, R. Freaney, J. P. McMullin, R. P. Towers, A. Spillane, P. O'Connor, P. O'Donohue, M. Moloney.*

Diaphragm Function and Alveolar Hypoventilation. *J. Newsom Davis, M. Goldman, L. Loh, M. Casson.*

The haematology of Hypothyroidism. *L. Horton, R. J. Coburn, J. M. England, R. L. Hims-worth.*

Idiopathic Oedema of Women. *O. M. Edwards, R. I. S Bayliss.*

A study of the Endocrine Manifestations of Hepatic Cirrhosis. *H. W. G. Baker, H. G. Burger, D. M. de Kretser, A. Dulmanis, B. Hudson, S. O'Connor, C. A. Paulsen, N. Purcell, G. C. Rennie, C. S. Seah, H. P. Taft, C. Wang.*

Price £4.50 net. Subscription price (U.K.) £13.00 per annum; £16.00 overseas

Salazopyrin ad infinitum!

"It is concluded that maintenance treatment of ulcerative colitis with sulphasalazine (salazopyrin) should be continued indefinitely unless contraindicated by side effects."¹

The results of the above controlled trial carried out at the Nuffield Department of Clinical Medicine, Radcliffe Infirmary, Oxford are all the more welcome as earlier trials of cortisone² and prednisone³ at standard dosages have shown them to be ineffective in reducing the number of recurrences of ulcerative colitis.

"Fortunately, Sulphasalazine tablets, 0.5 grams 4 times a day will prevent relapses in the majority of patients with colitis, and

only a few patients cannot tolerate this relatively small dose, which can be continued indefinitely since we do not know when, if ever, it can be safely stopped"⁴.

Salazopyrin (sulphasalazine) is available as the plain 0.5g. tablet, 0.5g. EN-tab and as an 0.5g. suppository.

Literature and detailed information on Salazopyrin are available on request.

"The patients who received dummy tablets had more than four times the relapse rate of those receiving sulphasalazine"¹ (Salazopyrin).

Salazopyrin is a registered trade mark.

"A striking difference in the relapse rate".

Both groups of patients had been satisfactorily maintained for 1-5 years on Salazopyrin prior to the study, in which they took Salazopyrin or placebo for 6 months.
