Histopathology is a new international journal and an official publication of the British Division of the International Academy of Pathology. The primary purpose is to publish original histopathological material having clinical application in the study of human disease and it is thus designed to be of particular relevance and importance to the practising diagnostic histopathologist, and to investigate workers in clinico-pathological fields of study contributing to the better understanding of disease in man.

Histopathology is published bi-monthly at £27.00 (U.K.), £32.50 (overseas), \$80.00 (U.S.A. and Canada) per annum post free. It is delivered to North America by air freight and subscribers can expect to receive their copies within two weeks of British publication.
