<i>Discussion</i>	180
Normal and abnormal lipid metabolism in children	181
BARRY LEWIS	
<i>Discussion</i>	186
Risk factors of CHD in children—a retrospective view of the Westland study	187
J. H. DE HAAS	
SESSION III—HYPERLIPIDAEMIA, SMOKING AND HYPERTENSION	
<i>Chairman: PROFESSOR A. S. TRUSWELL</i>	
The place of the hyperlipidaemias	190
JUNE K. LLOYD AND RICHARD J. WEST	
<i>Discussion</i>	196
Smoking in childhood	197
BEULAH R. BEWLEY	
<i>Discussion</i>	199
Arterial changes in infants of smoking mothers	200
INGER ASMUSSEN	
<i>Discussion</i>	205
Blood pressure and its significance in childhood	206
RONALD M. LAUER, WILLIAM R. CLARKE AND LINDA K. RAMES	
<i>Discussion</i>	211
Motivating adolescents to reduce risk for chronic disease	212
CHRISTINE L. WILLIAMS AND E. L. WYNDER	
SESSION IV—PRACTICAL APPLICATION	
<i>Chairman: PROFESSOR D. MILLER</i>	
A national food policy for prevention of CHD?	215
A. STEWART TRUSWELL	
The attitude of the food industry	221
J. GREEN	
<i>Discussion</i>	222
The role of the media	225
HUGH JOLLY	
<i>Discussion</i>	227
Summing up: The paediatrician's responsibility for the prevention of coronary heart disease	228
OTTO H. WOLFF
