
The Psychiatry of Late Life

Edited by **Raymond Levy** PhD, MB, ChB, FRCP (Ed), FRCPsych, *Consultant Psychiatrist*, and

Felix Post MD, FRCP, FRCPsych, *Emeritus Consultant Psychiatrist*
both of the Bethlem Royal Hospital and the Maudsley Hospital, London

The recent growth of interest in the psychiatry of old age has been reflected in the increasing number of publications in the field. This book aims to fill the gap between the briefer and more elementary books and the very large and comprehensive reference works. It is aimed primarily at psychiatrists in training and at practising psychiatrists wishing to learn more about the subspeciality of psychogeriatrics, but it will also prove of interest to those in other disciplines such as psychologists, social workers, nurses and general practitioners, and to non-medical readers working with the elderly.

Contents: The ageing brain and its pathology; The psychology of ageing: assessment of defects and their management; The psychiatric aspects of physical disease; Psychopharmacology of old age; The dementias of old age; Functional disorders I: description, incidence and recognition; Functional disorders II: treatment and its relationship to causation; Making services work: organisation and style of psychogeriatric services; Psychogeriatric care in the community.

1982. 306 pages, 17 illustrations. £12.50

Blackwell Scientific Publications

BRITISH POSTGRADUATE MEDICAL FEDERATION

The British Postgraduate Medical Federation comprises 13 specialist Institutes as listed below, to which those interested in specialist postgraduate training should apply. Additionally, the Central Office organises courses in Advanced Medicine, enquiries concerning which should be addressed to 33 Millman Street. For the coming year, the following courses are planned:—

Advanced Plastic Surgery
Advanced Virology
Sexually Transmitted Diseases
Endocrinology
Nephrology

Advanced Pathology
Gastro-enterology
Liver Disease
Clinical Update for Occupational
Health Physicians
