TRADE MARK

NEOTROPIN

BRAND

BUTYLOXY-DIAMINO-AZO-PYRIDIN.

A urinary antiseptic of remarkable powers of penetration and tissue affinity; highly bactericidal

Original Packing:
Bottles of 30 dragées
of 1.5 grains.

The curves show the increase in growth of bacteria in ordinary urine compared with the decrease in growth produced by Neotropin

NEOTROPIN is a dye-stuff of the azo-pyridine series and possesses the marked powers of penetration and tissue affinity inherent to dyes. Shortly after its administration it imparts a yellowish red colour to the urine and later the prostatic, testicular and cervical secretions.

The bactericidal effects of Neotropin have been confirmed by a long series of experiments both in vitro and in vivo. Even in a dilution of 1/512,000 it still inhibits bacterial growth.

Its combined penetrative and antiseptic properties render it invaluable in the treatment of Bacteriuria, Cystitis, Pyelitis and Pyelonephritis.

Its freedom from any irritant effect explains its remarkable efficacy in acute gonorrhoea and cystitis.
