THE AGEING POPULATION

Burden or Challenge?

Edited by Nicholas Wells
and Charles Freer

The structure of western society is changing as more and more people live longer, healthier lives and families become smaller – the population is greying. This change requires changes in attitudes to the elderly and by the elderly. It is no longer enough to consider the elderly merely as a burden. We must face up to the challenges of this growing section of our community and be more flexible and creative in our responses to their needs.

This book is a multidisciplinary review of some of the more important questions in the field of ageing and the care of the elderly. The contributors are leading experts in gerontology, demography, health economics and the care of the elderly. Together they provide a comprehensive, detailed and up-to-date analysis of the ageing of the population and its implications for services.

Humors, Hormones and The Mind

BERNARD DONOVAN

An approach to the Understanding of Behaviour

Brain science is passing through a revolution, with the progress in recent years being remarkable. The new knowledge is of major practical impact in helping us understand the way we behave and in providing new methods for the treatment of mental illness.

Much of this new material is highly complex and difficult to comprehend. This volume sets out to convey the interest and excitement of recent findings in a manner understandable to a wide cross-section of medical and non-medical workers.

Contents

Preface	6 Peptide Humors	13 Eating and Drinking
INTRODUCTION	7 Immunohumors	14 Masculinity
1 Humours, Humors and Hormones	HOW THE HUMORS AFFECT	15 Femininity

THE MANAGEMENT OF

AIDS

PATIENTS

**DAVID MILLER, JONATHAN WEBER
AND JOHN GREEN**

The Management of Aids Patients provides essential management information for all professional groups likely to be involved with AIDS patients.

- **Urgently required information for health-care professionals everywhere**
- **This book cuts through the sensational aspects of the disease to give solid advice and information to those involved in patient care**
- **The editors and many of the contributors come from St Mary's Hospital, London one of the foremost centres in Britain for the treatment of AIDS patients.**
- **The book emphasises practical and clinical approaches to clinical problems**

The book gives advice on the relative degrees of risk of infection from the virus which health professionals will face in personal contact, and the appropriate precautions required to minimise their personal risk. Diagnostic procedures are also indicated, as well as guidance on counselling, and the advice it is appropriate to give to those most at risk in the community about reducing their likelihood of contracting the virus.

Journal of Human

HYPERTENSION

This new journal is exclusively concerned with the clinical aspects of human hypertension. Our understanding of the cause, as well as the detection, investigation and treatment of this disease remains inadequate. The journal aims to perform the dual role of increasing knowledge in the field of high blood pressure as well as improving the standard of care of patients. Practising clinicians, general practitioners, research workers, and nurses, as well as epidemiologists should find it of interest.

Contents of a Recent Issue**PAPERS**

Calcium metabolism and blood pressure in children
STRAZZULLO, P., CAPPUCCIO, F.P., DE LEO, A., ZAPPIA, V. & MANCINI, M.
Apparent improvement in diabetic autonomic neuropathy induced by captopril
MOORE, M.V., JEFFCOATE, W.J. & MACDONALD, I.A.
Predictors of blood pressure change in a series of controlled dietary intervention studies
NISSINEN, A., PIETINEN, P., TUOMILEHTO, J., VARTIANEN, E., IACONO, J. & PUSKA, P.
Lisinopril in essential hypertension: a six month comparative study with nifedipine
RICHARDSON, P.J., MEANY, B., BRECKENRIDGE, A.M., GRIMMER, S.F.M.,
JOHNSTON, G.D. & KONDOWE, G.
Enalapril and microalbuminuria in diabetic and non-diabetic hypertension
KELLEHER, C.C., FERRISS, J.B., COLE, M. & O'SULLIVAN, D.J.
Hypertension treatment without labelling effects: the North Karelia Project
KOTTKE, T.E., TUOMILEHTO, J., NISSINEN, A., ENLUND, H. & PIHA, T.
The effect of chronic prazosin therapy on the response of the renin-angiotensin system in patients with essential hypertension
WEBB, D.J., FULTON, J.D., LECKIE, B.J., MALATINO, L.S., MCAREAVEY, T., MORTON, J.J., MURRAY, G.D. & ROBERTSON, J.I.S.
Trends in stroke mortality and in antihypertensive treatment in Finland from 1972 to 1984 with special reference to North Karelia
TUOMILEHTO, J., PIHA, T., NISSINEN, A., GEBORS, J., SALONEN, J.T. & PUSKA, P.
Table salt and blood pressure in Greek children
ADAMOPOULOS, P.N., CHANIOTIS, F., KODOYIANIS, S., BOUTSICAKIS, J., MADALOS, P., KASSOS, D., GATOS, A. & MOULOPOULOS, S.

PSYCHOPHYSIOLOGIC ASPECTS IN ESSENTIAL HYPERTENSION

Psychophysiologic aspects in essential hypertension
SCHMIEDER, R.E., LANGEWITZ, W., OTTEN, H., RUDEL, H., SCHULTE, W. & VON EIFF, A.W.
How to perform mental stress tests
SCHMIEDER, R., RUDEL, H. & NEUS, H.
Pressor response to stress and exercise in the young: intracellular ion content relationships and prognostic implications
AMBROSIONI, E., BORGHI, C., COSTA, F.V. & MUSSI, A.

CASE REPORT

Phaechromocytoma presenting with cardiogenic shock and acute renal failure
VENKAT RAMAN, G.
