

## NACT Training Package

This is an open learning study pack which aims to improve the teaching skills of clinical tutors and other tutors. Topics covered include junior doctors' educational skills and their provision, the funding and management of resources, managing change, and the operation of postgraduate centres. The development of the package was funded by the Department of Health and produced with the help of the Open University and the Joint Centre for Educational Research and Development in Medicine.

*Further information about the NACT Training Package, which costs £50 including postage, can be obtained from the Secretariat, NACT, 6 St Andrew's Place, London NW1 4LB (Tel. 071 935 5556)*

### ■ Aims and scope

The principle objective is to publish research articles and critical reviews in the fields of food sciences and nutrition, with special emphasis on the emerging interface between the two sciences.

### ■ Topics to be covered include:

- Impact of nutritional science on food product development
- Nutritional implications of food processing
- Bioavailability of nutrients
- Nutritional quality of novel foods
- Food – nutrient interactions
- Use of biotechnology in food science/nutrition
- Tropical food processing and nutrition
- Food acceptability and dietary selection
