Clinical specimen and literature on request from
SCHERING LIMITED, 3, Lloyd's Avenue, London, E.C.3.

ROTUNDA HOSPITAL, DUBLIN.

The Hospital contains 127 beds. Upwards of 2,000 maternity cases and 1,000 gynaecological patients are treated during year. Besides the Hospital, there is an external Maternity Department with over 2,000 cases. The routine for students consists of attendance at the Morning Lectures on Midwifery and Gynaecology, examination of patients in the Gynaecological Department, attendance at operations, and all abnormal labour in the Hospital Wards and conduction of labour cases in the home and extern departments. Students, both qualified and unqualified, attend the Antenatal Clinics, the Infants' Ward Dispensary. The Pathological Laboratory is also available. An X-ray Plant is used for diagnosis and treatment. Qualified students are given facilities for observing and following the course of all abnormal cases in the hospital or in district, and, where practical, are allowed to perform some minor obstetric and assist at gynaecological operations. The Hospital Courses are always going on during the year, and Students can join at any time. The Class is limited, therefore it is advisable to register in advance. Board and residence can be obtained in the Hospital; the living accommodation has been much improved lately. Extra classes in gynaecological diagnosis and operative midwifery are conducted by assistants to the Master.

Fees, one month £6 6s.; months other than the first, £4 4s.; 3 months £12 12s.; 6 months £21.

The L.M. certificate is given to fully-qualified practitioners of Medicine, on examination after six months resident attendance at the Hospital.

Full particulars from **BETHEL SOLOMONS, M.D., Master, Rotunda Hospital.**
